Savannah Resources Plc

New Corporate Presentation and Investor Evening Agenda

Savannah Resources plc (AIM: SAV) ('Savannah' or 'the Company'), the AIM quoted resource development company, is pleased to announce that a new corporate presentation will be made available to view on the Company's website www.savannahresources.com. This presentation will be used by Chief Executive Officer David Archer to provide investors with an update on the Company's asset portfolio at the investor event being held at 6.00pm on Tuesday 13 December 2016 at The Chesterfield Mayfair Hotel, 35 Charles Street, London, W1J 5EB.

The agenda for this investor evening will be as follows:

- 6.00pm – Room opens
- 6.15pm – Introduction from Savannah Chairman, Matthew King
- 6.20pm – Presentation by Savannah Chief Executive Officer, David Archer, followed by Q&A session
- 7.20pm – Drinks and canapes and opportunity to speak with the team
- 8.45pm – Ends

This announcement contains inside information for the purposes of Article 7 of Regulation (EU) 596/2014.

Notes

Savannah Resources Plc (AIM: SAV) is a growth oriented, multi-commodity, development company.

Mozambique

Savannah operates the Mutamba heavy mineral sands project in Mozambique in collaboration with Rio Tinto, and can earn a 51% interest in the related Consortium, which has an established initial Indicated and Inferred Mineral Resource Estimate of 3.5 billion tonnes at 3.8% THM over the Jangamo and Dongane deposits. Under the terms of the Consortium Agreement with Rio Tinto, Savannah must deliver the following to earn corresponding interest in the Mutamba Project: scoping study - 20%; pre-feasibility study - 35%; feasibility study – 51%. Additionally, the Consortium Agreement includes an offtake agreement on commercial terms for the sale of 100% of production to Rio Tinto (or an affiliate).

Oman

Savannah has interests in two copper blocks in the highly prospective Semail Ophiolite Belt in Oman. The projects, which have an Indicated and Inferred Mineral Resource of 1.7Mt @ 2.2% copper and high grade intercepts of up to 56.35m at 6.21% Cu, with additional gold upside potential, provide Savannah with an excellent opportunity to potentially evolve into a mid-tier copper and gold producer in a relatively short time frame. Together with its Omani partners, Savannah aims to outline further mineral resources to provide the critical mass for a central operating plant to develop the deposits, and in December 2015 outlined exploration targets of between 10,700,000 and 29,250,000 tonnes grading between 1.4% and 2.4% copper.

Finland

Savannah has Reservation Permits over two new lithium projects, Somero and Erajarvi, covering an area of 159km² in Finland. Savannah holds a 100% interest in these projects through its Finnish subsidiary Finkallio Oy. Geological mapping by the Finnish Government within the project areas has highlighted the presence of lithium minerals spodumene, lepidolite and petalite with the Government also identifying Somero and Erajarvi as one of the most prospective areas to discover lithium deposits in Finland. Savannah plans to initiate an exploration programme including data compilation, geological mapping and surface sampling with the aim of generating drill ready targets during 2016.
