### **About Savannah**

Savannah is an energy metals group focussed on becoming the first lithium raw material producer in Europe. A fast-paced development strategy is being implemented at the Mina do Barroso Project in Portugal, which hosts Western Europe's most significant spodumene lithium resource (currently 27Mt at 1.06% Li<sub>2</sub>O). Following completion of a positive Scoping Study on the project in June 2018, which was based on the then 14Mt resource, an 11 year operation producing an average of 175,000t per annum of spodumene concentrate, the Company is currently undertaking a Definitive Feasibility Study and an Environmental Impact Assessment on the project. The Mina do Barroso project could produce enough lithium annually for approximately 500,000 electric vehicle battery packs.

The Company also has a Consortium Agreement with Rio Tinto on the world class Mutamba Mineral Sands Project in Mozambique and has rights to two blocks in the copper-rich Semail Ophiolite Belt in the Sultanate of Oman.

Savannah is listed and regulated on AIM and the Company's ordinary shares are also available on the Quotation Board of the Frankfurt Stock Exchange (FWB) and the Börse Stuttgart (SWB) under the ticker "SAV".
