

REAL TIME MONITORING

Key facts about Measuring & Reporting the Project's Environmental Performance

In addition to the monitoring of the Project's environmental performance which will be undertaken by Agência Portuguesa do Ambiente and Direção Geral de Energia e Geologia, Savannah proposes a transparent approach to public reporting on the environmental performance of the Project. The Barroso Lithium Project will be a leader in environmental monitoring and information provision, in real time.

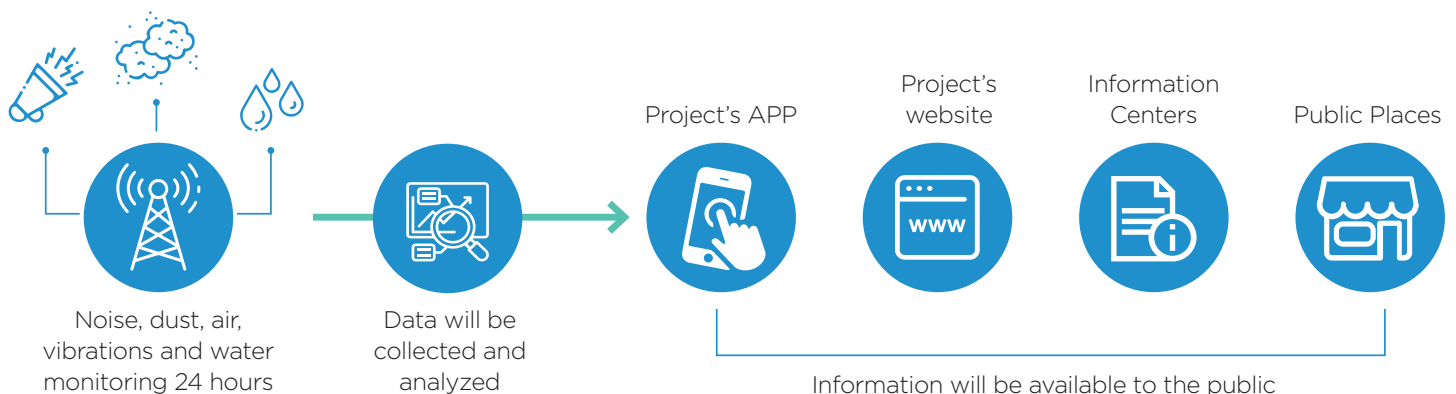

1. What is Savannah's Real Time Monitoring plan?

- ▶ Different environmental indicators (air, noise, vibrations and water - surface water, groundwater and river water) will be monitored, in real time, through a series of sensors distributed throughout the Project and surrounding area. The data will be collected and reported 24 hours a day, 365 days a year.
- ▶ Monitoring of environmental indicators will take place over the life of the Project, including after the operational phase is complete.

2. How will data be made available to the public?

- ▶ Smartphone app
- ▶ Company's website
- ▶ Information Centres
- ▶ Public places in the local area.

3. What are the advantages of collecting and reporting real-time data?

- ▶ Precise indication of the environmental performance of the Project over time.
- ▶ Real-time monitoring of the environmental performance will form part of the Project's overall Health & Safety program.
- ▶ Emergency situations can be identified and reported quickly. If an emergency situation is identified, Savannah will take immediate steps to rectify the problem and will keep all stakeholders updated on the status of the situation.
- ▶ If stakeholders have concerns about the Project's environmental performance, or the provision of data, they can raise these via a 24hr telephone hotline which will be set up, or at one of the Project's Information Centres during office hours (see contact details below)

If you would like more information or have any questions or comments, please visit or contact the Barroso Lithium Project Information Centres

Information Centre Addresses:

Boticas: Rua 5 de Outubro, nº26 , 5460-304

Covas do Barroso: Largo do Cruzeiro nº7, 5460-381

T : 276 413 042
